DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Group I:

Species A: an infrared light source.

Species B: a near infrared light source.

Species C: a combination of infrared light source and near infrared light source.

Species D: a visible light source.

Species E: a combination of all above light sources.

Group II:

Species F: a diffuse reflectance electro-optical detector.

Species G: an Indium-Gallium-Arsenic based detector.

The species are independent or distinct because they are not obvious variants and have materially different designs.

Because these inventions are independent or distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species in each group for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 8 and 23 are generic.

Art Unit: 3724

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
